Zombie Typing Game Notes

Neil Opena

About

1. Typing game where 2 people fight against each other

   - **Attacker** - releases Zombies
   - **Defender** - shoots Zombies

2. Each player will have a set amount of health and set damage dealt to Zombie

3. Player can switch states/roles by pressing *Tab* key

4. Player must press *Enter* to submit text

5. Health of Zombie correspond to word length

6. To kill or release: type the corresponding word displayed on screen

7. Attacker can choose length of word by pressing a number prior to the word

8. Attacker can choose symbols by pressing the ! (word entirely in symbols) or 1 (word entirely in numbers)

9. Winner gets coins, which can be spent on clothing, skins, etc.

Logistics

1. Use SQL to create database

2. Users can log in with username or password to save user model

3. Users can have an ID to specify if they want to fight against their friend

4. Perhaps create a friends list

Resources

1. Skillshare site of walking animations?

2. Udemy 2D course
